POLSTORE

PROFESSIONAL STORAGE SOLUTIONS

"DO YOU FIT THE POLSTORE PROFILE?"

With an established reputation in the manufacturing and engineering sector for 58 years, we are more than a supplier of storage units. We are a solutions-based company with the main goal of giving you back time and making your life easier.
Primarily we design, manufacture, supply and install workshop and warehouse storage through our wide product range and reliable and trusted supply chain. We champion workshop storage solutions in heavy use environments – it creates efficiency, reduces waste, lowers costs, improves attitude, and motivates people within the workplace.

Our passion for sustainable design and manufacture filters through to all our product ranges. Buying into our product range attracts the type of client who has a passion for precise engineering design, who embraces detail, understands true quality and cares for that purchase decision.

As a team our mission is to supply a consistent high-end storage product ensuring the client experiences an exceptional level of service. For more complex needs, we work together with trusted sub-contractors throughout the UK and Europe, so that we can support you with full turnkey projects.

Our brochure shares first-hand accounts of how we have brought exceptional storage solutions to life for our clients. We're as passionate and committed about our solutions, as you are about your own workspace. Our experienced project sales team can offer advice from concept design through to installation, 100% confident that we can exceed expectations and will not walk away until we have.

We are a solutions-based company with the main goal of giving you back time and making your life easier.

LIFE TIME GUARANTEE
ON DRAWER SLIDES AND GUIDE RAILS

THINKING OUTSIDE THE BOX

Adam Lucas, Managing Director, testing the weight load of a cabinet drawer!

One of my earliest memories of the business was assembling guide rails into 9400 cabinets the wrong configuration and being ticked off by our Stores Manager for wasting his time – harsh but I can now appreciate his impatience. I was always in awe of all the manufacturing equipment there and how from old school rough sketches stunning storage systems were created.

As soon as I was able to work, I joined the business, which my parents started in 1963. I started in the welding and fabrication areas, and eventually progressed to running the warehouse. I was extremely fortunate to be mentored by experienced engineers, to learn my skills from the very best, in my opinion. Their focus, their precision, their finesse. It was a privilege to work alongside them and memories I will never forget.

This is what I'm determined to carry through the business in the decades to come. For new joiners to come in and absorb the skills and passion from those who've done the same with the generation before them. It's a bit like keeping the original engineers my parents recruited alive in the business, fifty years on and beyond.

Why is that important to me? Quite frankly, it's how the business has grown to be the success it is today, and I believe it's shaped the man I am today also. When I'm discussing a client's needs with them, I just instinctively know what it is that they need and what will give them a long term workspace storage solution. It's been

instilled in me, from the very beginning, the importance of really listening to my clients. Every solution is bespoke to each client, because the solution is as unique as they are. When they work with Polstore, they get our collective years of experience which means we ask the right questions in order to dissect their challenges, and identify the right solution quickly.

Our business wouldn't be here today if we didn't innovate and challenge the status quo though. Making small incremental improvements over time transforms the work we do and that for me is true

"Our business wouldn't be here today if we didn't innovate and challenge the status quo"
job satisfaction. And it's not just me leading this change; it's a culture created within Polstore. We all challenge each other to think differently and to consider alternatives and ultimately achieve a better solution.

I'm always looking to move the business forward and find innovative new product offerings to improve the service to our clients. A recent example of this development in action are the new plastazote routed foam shadow boards and foam inserts we now offer as part of our tool and asset control solutions. We introduced the customised foam inlays in 2020 because they are an extremely cost-effective way to protect any asset; tools, fixtures or artefacts. We use the latest CAD/CAM software and our Trend CNC 3-axis machine, to create plastazote in different colours and thicknesses and the end result can be seen as a work of art!

This year we've introduced our new ranges of warehouse storage and handling solutions as well as garage workshop storage solutions. We're also increasing our client base within motorsport and car restoration in addition to our core sectors of expertise in Education, Engineering, Heritage and Military

Whatever I'm working on, now and in the future, my first priority is building a great and happy team. If there's one business lesson I've learnt, it's that Polstore would not be what it is today without its people. I want people to want to work for Polstore because it's a great place to work, enjoyable, with good people and of course, exceptional products and great clients.

0800 008 6861

WHY WE DO IT BETTER?

Our drawer cabinets are tough and robust, even after 40 years of heavy use they are still in service.
01 WELDED CONSTRUCTION
Put us to the test, put some weight in it
No pop rivets or clip systems, which is why there is zero twist or distortion under load, ensuring smooth drawer movement, each and every time (4500kg SWL/cabinet). Use as a bench or machine stand freeing up valuable workshop space.

02 NON-CORROSIVE
Built to last – two layer process
Our environmentally friendly painting process ensures a high resistant coating – all metalwork is initially dipped and painted inside and out to eliminate corrosion. A second coat is then applied colour choice dependant.

03 PAINT FINISH
Key for durability and after all you want it to look good
All products are supplied in a smooth semi-gloss paint finish. If you want to customise – go ahead, we can do what you want!

04 POSITIVE LOCKING SYSTEM
The one thing, you don't want to fail
A strong steel vertical locking bar rotates to create a positive locking system. The anti-tilt mechanism ensures you can only open one drawer at a time. Supplied with two keys (Master key available). **Upgrade to electronic locking.**

05 CABINET SIZE
It makes for quite a decision
There is a multitude of sized Polstore cabinets. The system is purposely designed to be modular so you can create any specification, allowing the cabinets to be re-configured at any time.

06 DRAWER & SLIDE SYSTEM
Super smooth action – more weight the better
Manufactured from steel the top of the drawer has a secondary fold to avoid sharp edges giving the drawer strength and stability. The handle is anodised and can be removed if damaged avoiding full drawer replacement. A neat labelling system is supplied comprising of a paper card insert and plastic cover strip. There are 2 types of drawers – NORMAL = 90% extension with a max load per drawer of 100kg. FULL = 100% extension with a max load of 200kg per drawer.

07 DRAWER DIVIDER KITS
Get creative, don't overlook this
The side walls of the drawers have location slots every 17mm allowing for the installation of a large range of drawer divider kits. The drawer base is perforated to enable partitions to be mechanically fixed stopping migration of items stored.

08 ACCESSORIES FOR YOUR CABINET
Personalise and upgrade – stand out from the crowd
Two-way pallet bases allow you to move the cabinet with a pallet truck or forklift, at a moment's notice. Base plinths for raising the cabinet from the floor, preventing damage, wear and flood risk. Hinged lockable doors creating a drawer / cupboard mix. 3 & 4 sided upstand and removable smooth rubber mat – stopping items rolling off and transforming the top of the cabinet into a work surface. Perforated panels and hook kits can be fixed to the back of the cabinet for hanging tools and other items. Worktops can be supplied in a number of materials and finishes, turning your cabinet into a robust and useful workbench.

Polstore drawer storage cabinets thrive on weight loads – the heavier the load stored, the smoother the movement. 100% of the drawer volume is used as the height of the drawer side and rear matches the drawer front. This prevents loose storage items falling out from the sides.

CREATING THE '"WOW"' IN WORKSHOP STORAGE

There were three components to this workshop storage solution. Firstly, our premium CNC and machine tool storage shelving system with sliding lockable doors and pull-out drawers with a load capacity of 200kg – fitted with internal tool cradles and CNC tool holders essential for the heavy tooling. Reassuringly, our drawer cabinets are covered by our 5-year warranty and all our drawer slides and guide rails are covered by a lifetime warranty.

Secondly, we provided 2 types of industrial workbench systems - a 3-metre-long workbench and multi-station hexagonal bench. Each were made up with a combination of workshop drawer cabinets which were tailored to their needs with bench mounted roller shutter cabinets and tool shadow boards.

A popular product we see engineering clients invest in to organise the drawer internals, is our routed foam inserts. These are a cost-effective storage solution which instantly alerts a user if an item is missing through a very simple visual cue.
The third and final aspect of this client's storage solution were the pull-out vertical drawers for storing small parts and consumable tooling. Each drawer is fitted out with our plastic tilt bin system 'Unibox'. Here the tools are easy to see and access using transparent compartments of various sizes. The vertical pull out drawer system has a 500kg SWL rating per drawer perfect for industrial environments.

The Polstore team is as passionate and committed about storage solutions as our clients are about workspaces. We offer a full service from discussing your needs through to exceeding expectations at install and handover.

We're proud of the results we bring to our clients, knowing they will stand the test of time, heavy repetitive use and still create the 'wow' factor!

First impressions count.
The brief to Polstore from this engineering customer was that the workshop storage put in place delivers the 'wow' factor!

BLUE DIAMOND
Engineering Limited

POLSTORE

If it's a bespoke workshop fit out you are looking for – call us on 0800 008 6861 or email enquiries@polstore.co.uk, to see how we can help you.

IT'S WHAT'S ON THE INSIDE THAT COUNTS.

Having an organised and accessible workspace allows you to maintain focus on your daily tasks. Consider the time which could be saved from knowing exactly where your tools and equipment are, precisely when you need them. Productivity can be hindered by simply walking around the workshop, hunting down tools, whilst easily building up frustration amongst the team.

Foam inlays add that final piece of finesse to organisation within your workshop. They can be integrated within any of our storage solutions, including protective cases, container trays and tool cabinets. Extremely cost-effective, anything can be protected - tools, fixtures, artefacts.

Designed and manufactured in-house at Polstore, we use different grades of plastazote, a man-made polyethylene, which is chemically inert, flexible, oil proof, waterproof, non-toxic and odourless. Plastazote can also be used in different colours and thicknesses to deliver a unique storage solution for your assets. In fact, apply some bold colours and you can easily identify any missing items!

Our customised designs are created in just a few simple steps. Data capture, profiling, design, approval, then creation. We can remove the inconvenience of items being taken "off-site" and data capture can be completed at your premises, and even train your team to complete the data capture themselves, for objects of a sensitive nature.

This is where the experience of our team excels. We're as passionate and committed about storage solutions as you are, and the six-stage process which we follow ensures that the end result we deliver is exceptional. Take your workspace organisation to the next level with customised foam inlays.

Please contact us on 0800 008 6861 or enquiries@polstore.co.uk for any requirements you may have.

Warehouses by nature are larger in size, but this doesn't mean there's space to waste. Housing large or multiple objects means the use of every square inch needs to be maximised. Our warehouse and handling solutions allows you to optimise the space for your needs today, and in the future, giving you a truly long-term dynamic storage solution.

The key to our cost-effective storage solutions is flexibility. With our extensive range of shelving and racking accessories and a series of solutions, an infinite number of designs can be achieved.
Industrial pallet racking and longspan shelving can be easily configured in a variety of ways to enable your business to increase capacity, productivity and efficiency and focus on the task in hand.

The addition of mobile shelving systems can speed up storage and retrieval times, as well save up to 80% in floor space with the same storage volume.

As your requirements change, simply reconfigure your storage system as and when required suiting a variety of applications.

With qualified and professional installers Polstore has the expertise and resources to deliver an exceptional warehouse storage solution just for you.

Please contact us on 0800 008 6861 or enquiries@polstore.co.uk for any requirements you may have.

FLEXIBLE WAREHOUSE STORAGE & HANDLING SOLUTIONS

Secure Storage Solution

FOR RESEARCH CENTRE'S WORKSHOP

Polstore's clients receive the same exceptional service and advice but the end result will be bespoke to your workspace.

Nuclear Advanced Manufacturing Research Centre (NAMRC), part of the University of Sheffield, are at the forefront of innovation and manufacturing development. The open facilities and services at NAMRC mean security is a top priority. A variety of workspaces were created to suit the working arrangements required by the different teams.

Here we created an 'L' section for each working module with workshop storage cabinets and heavy-duty worktops, ideal for a more structured workspace.

The workshop storage area for product development was inspired by the U-shape layout we use in Formula 1 motorsport workshop fit outs, this larger space was fitted with mobile cabinets on castors so they can be easily moved around.

Over £35 million worth of state-of-the-art manufacturing equipment is stored onsite. We retrofitted the workshop drawer and cupboard units with an intelligent smart key and access control system, eLOQ. This inexpensive but highly secure system offers a greater degree of flexibility and auditability.

The rented workspaces for research and product development were fully controlled by the eLOQ system. NAMRC know exactly where their equipment is, they can control who has access to it and when. The workshop drawer cabinets were also fitted out with plastazote foam inlays which help to identify misplaced tools, as well as keep them protected when stored.

Whether you have one room or a whole workshop to optimise, our team at Polstore can give you workshop storage solutions which deliver to your needs, today, tomorrow and in the future.

If you are on the lookout for workshop storage solutions – call us on 0800 008 6861 or email enquiries@polstore.co.uk for advice on how to optimise your workshop.

POLSTORE
STORAGE SYSTEMS

eLOQ
COMMERCIAL SMARTKEY SOLUTIONS

One single electronic key can open up to 3,000 padlocks, cylinders and camlocks

eLOQ is an intelligent smart key and access control system which has been designed to offer not only high security, but also offers a greater degree of flexibility and auditability not otherwise possible with traditional access solutions.

Although eLOQ locks are electronic, they contain no batteries and do not require wiring. With a wide range of easily retro-fittable cylinders and padlocks available, introducing eLOQ means you can implement incredibly flexible levels of remote access control to your organisation.

With a collection of advance features such as; audit trails of key usage, the ability to disable lost keys and electronic rekeying & scheduling, eLOQ embraces modern technologies and innovations to bring a unique control for the protection of goods and assets.

The eLOQ Access Control system operates in much the same way as a traditional lock & key set-up, but with the ability to personalise unique time and date restrictions for each user. This means you have complete control over which locks can be accessed and when.

0800 008 6861

enquiries@polstore.co.uk

f 🐦 📷 / polstoreuk

eLOQ Key

Central to the eLOQ access control system is the individual User Keys; each of which can be programmed to each users own specific schedule and access requirements.

eLOQ Locks

With a wide range of different retro-fittable cylinders and padlocks available for a range of different environments, our locks are quick & easy to change and install.

eLOQ Key Readers

Required for scheduling and programming locks & keys, the eLOQ readers take many different forms from Wall-Readers, Computer Interfaces and Mobile Apps.

eLOQ Software

Easily update and amend user schedules using our secure, cloud-based software which has been designed to be user-friendly. Run complete audit reports on locks and keys to examine previous access activities.

HEIGHT ADJUSTABLE BENCH - ELECTRONIC OPERATION

There are several benefits to a sit stand workbench – the ability to switch to standing and sitting postures reduces physical stress, keeps you active and improves productivity. Gone are the days where you complain about worksurface heights just not being quite right. With a press of a button you can instantly personalise the working surface height to your optimum needs.

Due to electronically powered motorised bench legs the adjustment varies from a height of 750 mm up to a maximum of 1050 mm. The smooth and controlled movement makes the adjustment effortless.

The maximum load capacity of our electronic workbenches is 400 kg, giving you the flexibility to customise the bench design with additional features including drawer cabinets, power bars, perforated panels, shelves, overhead rails and lighting options.

With a premium hard wearing laminate, 40 mm worktop core and anodised aluminium support legs this makes our Series E48 workbench perfectly suited to workshop, warehouse and light industrial environments.

ANTI-FATIGUE MATTING

Anti-fatigue floor mats help reduce fatigue and increase productivity making them ideal for the workplace. Whilst giving extra comfort for prolonged standing they improve health and safety with a yellow safety border.

The underside structure design allows for cable management. Easy to assemble with clip connectors.
